

Volunteer Screening...Easy as 1, 2, 3!

YOUTH EXCHANGE ADMINISTRATION HUB

Welcome to YEAH!

The Rotary District 7010 Rotary Youth Exchange program uses YEAH (Youth Exchange Administration Hub) as our main "secure" online database. YEAH! tracks and monitors our students, host families and volunteers making sure we have all the required documentation required by Rotary International.

ANY NEW family or volunteer must be entered into YEAH to begin the vetting process and likewise, all inbound and outbound students will be using this database.

The YEAH vetting process for a new volunteer or host family begins by the YEO (or whoever it is in your club that usually begins that process) sending them a link. The volunteer or host family will begin the application process from the secure online link (identified by the "https" in the web address) entering all the reference information, etc. requested. An automated email will be sent to each of their references, and they will come back for review and approval. If there is a problem, or the references are not returned in a timely manner an alert will be sent out letting you know to follow up.

Let's Begin....

Youth Exchange Program Volunteering... Easy as...

START either a [Volunteer Application](#) or [Host Family Application](#).

All volunteer applications are processed online with applicants entering information via a secure web portal identified by "https" along with contact information for 2 references and completing the NAYEN Youth Protection Awareness Course online.

OBTAIN Volunteer Screening from your local Police Service.

There are several ways to obtain a current **vulnerable sector** Criminal History/Records/Background Check for Ontario residents. A letter from Rotary will be sent to the volunteer that can be used to obtain the check. **When a report has been obtained, email** a PDF to your District Chair who will upload it in the YEAH database and approve it. This must be done every five years.

COMPLETE the Youth Protection Awareness Course and Volunteer Training Course

The course links will be emailed from the YEAH portal and when you have obtained a passing grade, the system will automatically read and record the results in your profile within the YEAH database. **These links are unique to each individual, so anyone in the same household will be required to sign in on their own link.**
